Caterpillar
Butterfly
Ladybug
Mosquito
Bee
Cricket
Praying Mantis
Dragonfly

Amphibians

Frog
Salamander
Toad
Newt

Fish

Gold Fish Seahorse Tiger Fish Puffer Fish Angel Fish Sting Rays
Squid Grouper Octopus Beta Fish Sharks

OVIPAROUS animal Research

This month we have been learning a lot about oviparous animals and the different behaviors found in each of them. Along with completing the Research paper I would like for your child to create a setting for the animal they choose using a shoe box (or any box you have available). I asked the students to be creative and choose an animal that others may not pick. Attached is a list of the all the ones we have discussed in class feel free to add to it. The project is due on your child's show and tell day next week. Thanks for all your help I look forward to seeing all the wonderful things you come up with.
